

Pipol ERP Product Selection Workshop

As a leading provider of ERP solutions and services, our international clients frequently tell us how challenging it is to decide, which Dynamics 365 products are right for them to move their business forward.

In response, Pipol has developed a new, customized service for helping you determine, which is the right path to take for your business. It's our new ERP Product Selection Workshop.

Selecting the right Microsoft ERP product is business-critical

International businesses like yours often evaluate both Dynamics 365 for Operations and NAV for their business when implementing a new ERP solution. And it's essential to accelerate the process. The more informed and structured you are about the ERP product decision-making process, the smoother your company's international transformation will be.

Save time and money

Pipol's ERP Product Selection Workshop helps you determine the strategic fit of each product to your business—so you can avoid expensive and time-consuming comparative functional analyses. Simply put, it's ERP transformation made simple.

How does it work?

Our ERP Product Selection Workshop is customized to your company's precise needs, and together we'll tackle relevant topics such as business strategy and drivers, key decision criteria, Dynamics strategy, and more. At the end of the Workshop, you'll receive a high-level "Product Selection Report" containing everything you need to know to make the right choice.
